Tasya,
Please read below and provide email addresses for those of you at DOF who would need access to the DER. Thanks.
(And thank you, Elly.)

Subject: FW: Link to a OneDrive folder for the draft DER

Hi, Janette - This seems like a good solution!

It seems fine for Tasya (and I could find and forward her info), but in case others want to see it, perhaps we need to ask Tasya for a list of people to have access to the OneDrive folder with the info.

Subject: Link to a OneDrive folder for the draft DER

Hi Elly,

LDWG is okay with sharing the entire draft DER with Container Properties (former Rhône Poulenc) instead of pulling out all of the relevant sections and maps for that site.

However, we'd prefer to provide the draft DER using a OneDrive link instead of using the Sharepoint site since there is other information on Sharepoint. In order to use the OneDrive link, we will need the email addresses for the individuals who will need access. Could you send us the email addresses of those you would like to send the draft DER? We then can send them the link asap (with cc to you). The OneDrive folder is ready so we can take of this very quickly once we get the email addresses.

Thanks!
Tom
